Here are my suggested changes to the draft minutes:

Under data management: add a statement that it is also unclear when Scott's actually implemented the respirator program.

Under Other, last paragraph: Clarify that the exposure-response relationship that might be eliminated is the exposure-response relationship published in Rohs et al. (2008). [I don't need this as the new exposure reconstruction will be analyzed using Benchmark Dose methodology and Cox Regression.]

The rest looks OK.

Here are some updates for information.

1. I have sent to Amishi the masters thesis, the IH data from Scotts, Lockey et al. (1984), and Rohs et al. (2008).

2. I spoke to a Region 8 attorney about how to get the transcripts and depositions from the criminal trial. He will let me know the mechanism when he finds out.
